

MEDICAL SERVICES

Omega Medical Hospital, uses state of the art technology to diagnose and treat patients. Our team offers excellent patient care and is committed to the provision of a one of a kind patient experience. At Omega Medical Hospital, our service offerings includes:

General Surgery

Omega Medical Hospital team is comprised of world-class physicians in the discipline of surgery, having a central core of knowledge encompassing anatomy, physiology, immunology, nutrition, pathology, wound healing, emergency and intensive care.

Radiology

There has been an increasing demand for image-guided minimally invasive procedures, and these have become an integral part of present-day clinical practice. Omega Medical Hospital will be a beacon of change in administering this integral service known as Interventional Radiology (IR). This particular department headed by Dr. Kebby King one of the leading Interventional Radiologists in the field.

Cosmetic Surgery

Prioritizing the need for a deeper and more personal service, Omega Medical Hospital will be offering cosmetic surgery. This is a surgical specialty involving the restoration and or alteration of areas of the body. This will be administered by trained certified specialist, who will always have the patient's best interest at heart, with the goal of improving their appearance, self-esteem, and self-confidence.

Laboratory Services

The Omega Medical Hospital Laboratory will work on clinical specimens to give a clear and concise diagnose, treatment, so that proper treatment can be dispensed. Omega 's Lab offers :

- Blood Cultures / Microbiology
- Immunology
- Clinical Special Chemistry
- Haematology/ Hemostasis

Urology

Being Healthy also includes being able to procreate. With this said, we have some of the best Urologists who are trained in the management of conditions affecting some urinary system (kidneys, ureters, bladder and urethra, and the male and female external genitalia).
